We are happy to be back in Vienna with the 56th edition of the ERSA Congress. Under the umbrella topic ‘Cities & Regions: Smart, Sustainable, Inclusive?’, we are once more bringing together hundreds of young and senior researchers to stimulate regional science research with the exchange of the state-of-the-art developments in the field. With our world-class Congress hosting numerous prominent scholars, we are proud to continue to be the leader in Regional Science Conferences.

As in the previous editions, we are proud to receive an overwhelming answer of young researchers including many Ph.D Students and be entrusted with their contributions. On Thursday, 25 August, we very much invite you to attend the presentations of these promising talented researchers during the Young Scientists Sessions. The ERSA Epainos Award will recognise the most ambitious and innovative research presented by the young generation. Do not miss these Refereed Sessions!

President Foreword

Let me also take this opportunity to share with you our enthusiasm for ERSA’s networking connections and collaboration with renowned international institutions like the EU or EIB as well as with other associations. We truly believe that the impact of our research on society can be stronger by fostering links between academia and policy institutions.

With our REGIO/ERSA Lecture Series launched in 2015 and continuing this year, we welcome the attendance of institutions representatives willing to learn and exchange with our academics on acute topics relevant for regions. Moreover, in the framework of the 2016 European Week of Regions and Cities (previously named Open Days), we are proud to renew the last year’s successful experience and organise the 2017 EU Master Class in collaboration with AESOP and RSA.

On behalf of the ERSA Board, I would like to express my personal gratitude to the Local Organising Committee and particularly to its Chairperson Prof. Gunther Maier, for compiling this impressive scientific programme including Pre-Congress Workshops and Technical Excursions. Finally, let me also extend my special thanks to the WU University of Economics and Business and all sponsors for their support to make this event possible.

In this exceptional architectural setting of the WU Campus, I wish you a pleasant stay and fruitful participation in the 56th ERSA Congress with your colleagues and friends!

Jouke van Dijk
Professor and President of the European Regional Science Association (ERSA)
Welcome to Vienna
Welcome to Vienna! After eighteen years the ERSA congress returns to the capital city of Austria. Things have changed quite substantially since 1998, when the ERSA congress last was in Vienna and at WU, the Vienna University of Economics and Business. The ERSA congresses have grown in numbers of participants and are nowadays about twice as large as in 1998. WU built a new campus which offers excellent facilities and quickly turned into a tourist attraction as well as a site for university administrators to visit since the university moved in three years ago. Vienna benefitted from the Eastern enlargements of the European Union in 2004 and 2007 and moved from the periphery toward the center of Europe. After decades of declining population numbers Vienna is nowadays a growing city. Its population increased by 40,000 just in the year 2015 and is moving quickly toward the 2 mio. level.

A city growing that quickly needs substantial investments as well as careful management in order not to destroy its natural heritage and its social fabric. In the ERSA congress we will visit some of the hotspots of this development in our technical excursions. Our visits to „Seestadt aspern“, the largest urban development project in Vienna, and to „Nationalpark Lobau“, the national park reaching across the city boundaries, are just the two extremes. The political and social aspects of Vienna's growing population which is mainly due to immigration from abroad, will be dealt with in the excursion to „Magda's Hotel“, a project aiming toward the integration of refugees. But, despite of all these changes, Vienna is still the city of baroque castles and churches, of „Ringstraße“ architecture, of Otto Wagner and Adolf Loos, as well as the city that has been elected „most livable city“ for years in a row. We hope that despite of the tight academic program that we organized for you, you will be able to visit some of those sights and to experience the unique flair of Vienna.

WU, the university hosting ERSA 2016, has modernized substantially since 1998. This process is most visible in the new campus which you will experience first-hand during the congress. The buildings are not only functional and visually impressive, they are also „green“ according to the DGNB standard. Participants of the „Green Building Cluster“ excursion will get a deeper insight into what that means.

Although ERSA 2016 is held at WU, it is not just a WU-congress. Other regional science institutions in Vienna are represented in the LOC and have contributed substantially to the organization of the congress. With the theme „Cities and Regions: Smart, Sustainable, Inclusive?“ we connect the congress to the main themes of discussion in the EU. It echoes the main elements of the EU’s 2020 strategy which was adopted six years ago. The question mark in the congress theme points toward the need for critical reflection, analysis, and evaluation. It is our task as researchers to provide this critical view.

ERSA 2016 does not only want to talk about sustainability it also tries to act sustainably. For the first time in ERSA history this congress seeks certification as a „green conference“. Participants will experience this in numerous ways: from catering to the lack of giveaways, from reliance on public transport to the use of our web app. We hope that you will appreciate these innovations and will enjoy the congress, the venue, and the city.

Many thanks
Gunther Maier

Day by day programme

The presenting authors are marked in bold.
09.00-12.00

Workshop A. ➞ Tue_1a_Room TC.3.02

Spatial Econometrics Using Matlab and R +
Roger Bivand, James LeSage

This hands-on workshop will cover the use of the Matlab and R environments to show how spatial econometric models can be estimated and their output interpreted. The instructors will concentrate on more recent approaches to estimation and interpretation. Data preparation and estimation will be covered adequately, with weight on the interpretation of results.

Workshop B. ➞ Tue_1a_Room TC.3.06

Communicating Research Results to the Public
Oliver Fritz

This workshop will bring together researchers with various institutional backgrounds to discuss communication strategies in order to identify best practice elements. The focus will be on communication of research results to the general public and on its differences to the communication to the scientific community.

Break 12.00-13.00
No lunch prepared

13.00-16.00

Workshop C. ➞ Tue_2a_Room TC.3.02

Open Workflow in Regional Research
Thomas de Graaff

This workshop will deal with IT tools and solutions for research management; in particular with Markdown, the versioning system Git and the open repository GitHub. From a wider perspective, these type of tools serve brilliantly to make your research as reproducible as possible.

Workshop D. ➞ Tue_2a_Room TC.3.06

How to Get your Research Published
Roberto Patuelli

This workshop will deal with mechanisms and standards of academic publishing in regional science. Various publishers and journal editors will present their views about publishing standards, the development of the publishing industry and will be available for consultation and questions and answers.
Signatures of Regional Science

Regional Science Academy

This workshop will follow the “Signatures in Regional Science” format developed by the Regional Science Academy. Input will be provided by Hans Westlund, Edward Glaeser, Manfred Fischer, Wolfgang Lutz, Folke Snickars, Alessandra Faggian, and Laurie Schintler.
