12ème Colloque ERSA-RO

Iași-Roumanie

## CALL FOR SPECIAL SESSIONS

*Dear colleagues,*

*The 56th Conference of the Regional Science Association of French Language (ASRDLF) and 12th Conference of the Romanian Regional Science Association will be held in Iasi (Romania), from 4th to 6th July 2019.*

*Similar to our previous conferences, in parallel with the specific sessions of the conference and the recurrent sessions, it is possible to propose the organization of special sessions that fall within the scope of regional science.*

*The proposals for special sessions should be submitted by December 15th, 2018 and sent to : [asrdlf2019@gmail.com](mailto:asrdlf2019@gmail.com)*

### **Specific sessions for the 2019 conference**

T1 - Territorial Scales and "territorialization" of sustainable development, comparative approach East-West-South-North. Sustainable territorial development: what perimeters for which governance?

T2 - New challenges, tools and forms of operationalization of sustainable territorial development actions in Europe and worldwide

T3 – Metropolitan development, territorial dynamics at all scales and issues of territorial cohesion. Comparative approach East-West-South-North

T4 - Preservation of nature and resources, circular economy, climate change adaptation, control of land consumption, new challenges for cities and regions? Comparative analysis East-West-South-North

T5 - Territorial innovation for sustainable development

T6 - The challenges of sustainable territorial development for the training of planners and developers.

### **Recurrent sessions**

A - Methods and modeling

B - Resources and factors of sustainable regional and urban growth

C - Regional and Urban Policies, Evaluation

D - Territorial development

E - Spatial Competition, Public Economy, Local and Territorial Taxation

F - Urban economy, territory, space, theorization and modeling

**Instructions to the organizers of the special sessions:**

The organizers of a special session should present a scientific argument (reasoning) in the submission form which is attached to this call. This argument should introduce the proposed theme for the special session, as well as the call for papers. The language of the sessions is traditionally French, but the organizer can propose a session in English or a bilingual session. The organizing committee strongly encourages the organizers of special sessions to request the communications themselves, in particular those coming from young researchers (doctoral students or young PhDs).

The choice of papers to be selected for each session will be based on a double evaluation (a member of the scientific committee and an organizer of the special session).

The number of special sessions is limited to 30.

The results of the evaluation of proposals by the members of the scientific committee, validated by the organizing committee, will be announced to the proponents by December 15th, 2018.

The general call for papers will be launched on December 20th, 2018 and will be open until February 20th 2019.
